

Modular Avatar

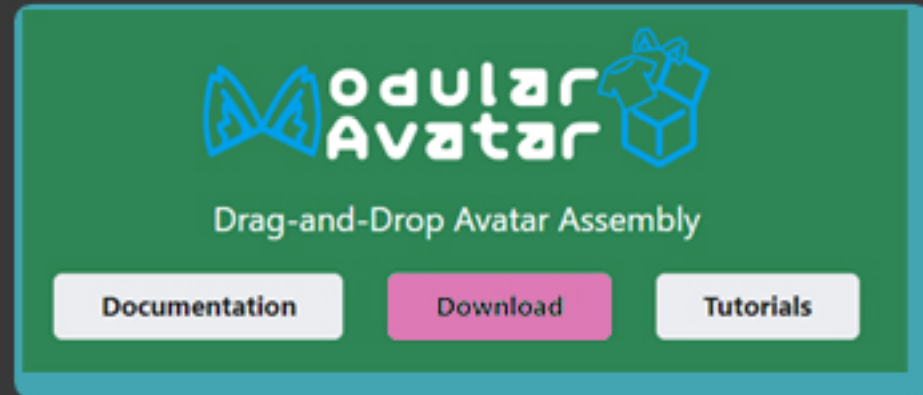

UMBRELLA SETUP

1

Install the latest version of Modular Avatar

<https://modular-avatar.nadena.dev/>

2

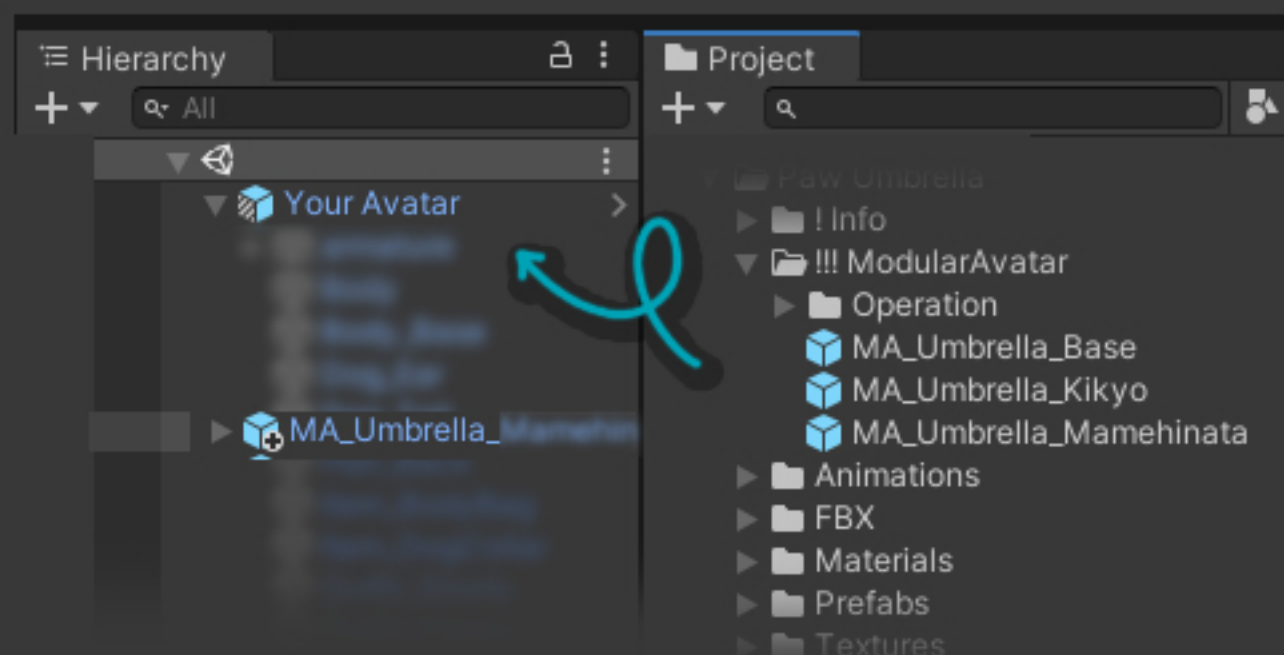

Install the latest version of lilToon Shader

lilToon <https://lilxyzw.booth.pm/>

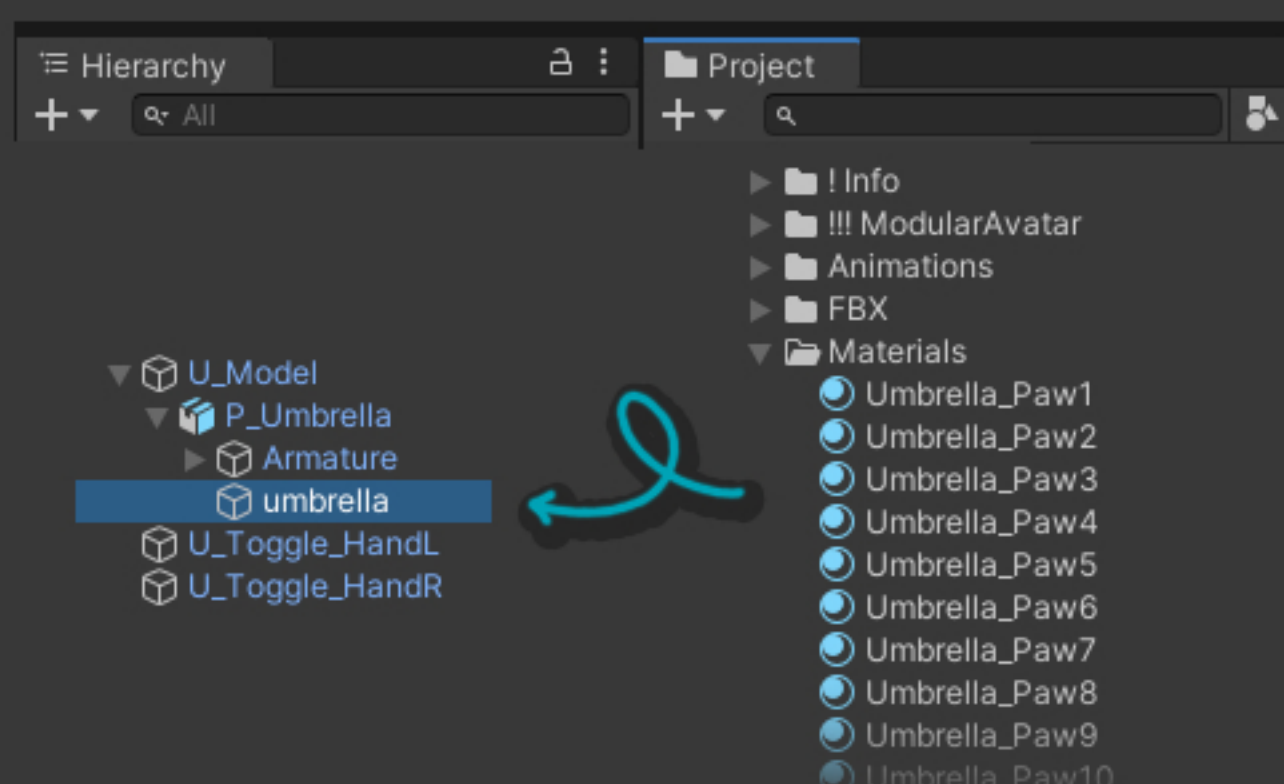

3

Drag the 'MA_Umbrella_' prefab onto your avatar

4

Choose your favourite colour variation from the 'Materials' folder, drag it onto the models.

...and you're done.

This is how it works:

- Turn it on from the Radial Menu
- Control it with Gesture

VR

Closed finger Point

Open Thumbs Up

Desktop

Open
Right Shift + f8

F8

Right Shift

Close
Right Shift + f4

F4

Right Shift

Comment:

The prefabs are made for the Mamehinata, Kikyo, Anon and Muromu avatars, but can be used for ANY AVATAR, just move the 'U_Toggle' to the right places.
